## Coding Efficiency

**~50% saving over H.265/HEVC**

emph. HD / UHD / 8K resolutions
emph. HDR / WCG
emph. 10 bit

## Versatility

Rendered "screen" content coding
Adaptive resolution changes
Independent sub-pictures
Tiles, slices and wavefronts
Layered multistream & scalability
Bitstream extraction and merging
360° video projection handling
Random access & splicing features
Gradual decoding refresh
